CENTRAL INTELLIGENCE AGENCY

Legend to Layout Sketch of the Moscor-Kolli Lens/Collin Factory.

1. Boilerhouse, built of reinforced concrete, 20 meters high, and covering about 30 x 20 meters. The boilerhouse had three steam boilers with automatic charging. A trench with pipelines ran from the boilerhouse to workshops 4 and 5.
2. Iron smokestack, about 40 meters high and 80 cm in diameter.
3. Storehouse for raw material, a stone building 50 x 20 meters, with a ramp.
4. A reinforced concrete building, measuring about 50 x 30 meters and housing a production workshop and a storage depot. One room had eight vacuum containers about 180 cm high and 200 cm in diameter, eight pumping installations, and a ramified pipe system, which had a network within the room itself and extended to workshop 5.
5. Production workshop, a reinforced concrete, seven-story building, covering about 40 x 40 meters. On the first floor of this building were five boilers which, 8 meters high and 4 meters in diameter, extended into the second floor. Also on the first floor were ten mixing boilers, about 150 cm high and 200 cm in diameter, and ten boilers, about 100 cm high and 80 cm in diameter. The third floor housed only small boilers up to 80 cm in diameter, and the fourth floor, according to fellow-Pws, had only laboratories. There were administration rooms on the fifth floor, and storage and drying rooms on the sixth and seventh floors.
6. Power station, a stone building, about 40 x 30 meters.
7. Garage, a stone building, covering 60 x 30 meters. Within the building were four excavations for foundations. Parked in the garage were eight plant trucks.
8. Repair shop, a stone building, measuring about 50 x 30 meters. This shop was equipped with all kinds of machine tools.
